

June 2017 Seminar
Wednesday, June 7, 2017
10:00 a.m. to noon

MANAGING TRANSACTIONAL AND LICENSING RISK IN THE ERA OF OPEN SOURCE, SECURITY BREACHES AND PRIVACY REGULATION

Presented by:

GTC Law Group PC & Affiliates

Tony Decicco, Esq.
David Bender, Esq.

Program

Modern businesses are voracious consumers of data and technology. Data and technology stream in from apps, mobile devices, websites, and, more often than not, from a company's own developers and marketers grabbing hold of anything they can find on the Internet to make their development and sales faster, cheaper and better. Meanwhile, data has become highly regulated, and software can be imported and used before its license context is understood or managed.

Topics to be covered include:

- Business, legal, technical and security risks associated with in-licensing data and software, both operationally and in the context of a financing or M&A transaction.
- The inadvertent and intentional use of open source software.
- Data privacy and cybersecurity compliance with respect to data and technology.
- Best practices in order to identify, assess and mitigate risks in the in-licensing of data and software.

The Westin Waltham Boston, 70 Third Avenue, Waltham, Massachusetts (781) 290-5600

Seminar: 10:00 a.m.-Noon Social Break: Noon-12:30 p.m. Lunch Served at 12:30 p.m.
